Hi there! 👋

My name is tharuni. How can I assist you today?

hello ai

Hello! How can I help you today?

can you access my Sheet1

I can access Google Sheets, but the available tool for getting rows in a sheet doesn't allow me to specify the sheet name, such as 'Sheet1'. It simply retrieves rows from a sheet. Is there more information you can provide to help me access 'Sheet1'?

can you provide sheet1 information

Here is the information for Sheet1:

- Time Slot: 6:00 – 7:00 AM
  - Task/Activity: yoga, exercise, pooja
  - Priority: High
  - Status: Started
  - Notes: 10min spend today
- Time Slot: 7:00 – 8:00 AM
  - Task/Activity: breakfast & ready for work
